

\$CONTRAX

WHITEPAPER

With the rapid growth and proliferation of decentralized applications, the need for simplified solutions in the realm of smart contracts has become more pronounced. CONTRAX, an innovative ERC20 utility token, aims to bridge this gap by offering users seamless automated deployment and interaction with smart contracts, thereby democratizing the power of blockchain for all.

Token Specifications

Token Name: CONTRAX

Symbol: CONTRAX

Total Supply: 10,000,000 CONTRAX

Launch Date: September 4th

Utility

Token Deployment Automation:

With CONTRAX, even users with minimal technical knowledge can deploy their contracts effortlessly. The utility automates the entire deployment process, making the creation of smart contracts more accessible than ever.

Auto Verification & LP Addition:

One of the most notable features of CONTRAX is its ability to auto-verify contracts, adding an extra layer of trust and transparency to the process. It also simplifies the liquidity provision by automatically adding LP, ensuring the token's smooth market operations.

Contract Interaction:

Say goodbye to the tedious manual interactions with smart contracts. With CONTRAX, users can perform contract interactions directly through the utility, saving time and reducing complexity.

Upcoming Features

Automated Liquidity Locking:

In the spirit of fostering trust and reliability, CONTRAX will soon introduce an automatic liquidity locking feature. This will further ensure safety and stability for all market participants.

Upcoming Tools Integration:

The first tool to be introduced will be:

Chimera: An integrated tool designed to evaluate the safety of tokens. It will check parameters like LP lock status, ownership renunciation, and scan for potentially harmful code, enabling users to make informed decisions ahead of time. Chimera can even detect hidden malicious codes, meant to be obfuscated from the average user.

The following tools will be redacted until the next public announcement:

XXXXXX Bot: A game-changing utility that XXXXXXXXXXXX, bypassing the conventional route XXXXXXXX XXXXXXXX.

XXXXXX Bot: XXXXXXXX becomes a breeze. Users will no longer have to XXXXXXXX, streamlining the XXX process.

Access Tiers

To ensure a broad spectrum of users benefit from the features and tools provided by CONTRAX, we have introduced a tiered structure:

1. Basic Tier:

Requirement: Hold tokens equivalent to 0.1 ETH.

Benefits: Exclusive access to the token deployment utility, making the process of creating tokens straightforward and hassle-free. Deployment fees apply.

2. Premium Tier:

Requirement: Hold tokens equivalent to 0.25 ETH.

Benefits: Enjoy all the benefits of the Basic Tier, with added access to all current and future CONTRAX utilities. This tier is designed for the more adventurous user seeking an enhanced experience. Deployment fees not applied.

3. VIP Tier:

Requirement: Hold a minimum of 100,000 CONTRAX tokens or 1 ETH equivalent.

Benefits: A class apart, the VIP tier offers all the perks of the Premium Tier, but with additional advantages. VIP users will receive enhanced features and will also be the first to access any new utilities introduced. No fees applied to any utilities.

Conclusion

The CONTRAX token is not just a cryptocurrency; it's a revolutionary tool aimed at simplifying the world of smart contracts. With its array of features and an exciting roadmap, CONTRAX is poised to make waves

in the decentralized application space.

For any queries, feedback, or suggestions, feel free to reach out to our team. We're always eager to engage with our community and together, we envision a decentralized world powered by CONTRAX.
